## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over *J. Org. Chem.* (1977), 42(14), p. 2436-2439 and *Adv. Synth. Catal.* (2003), 345, p. 165-168, both cited by applicant in the IDS.

Applicant claims processes for the synthesis of optically active 1-aryl-2-fluoro-substituted ethylamines (claims 1-6).

*J. Org. Chem.* (1977), 42(14), p. 2436-2439 teaches the synthesis of optically active 1-phenyl-2-perfluoro-substituted ethylamines starting from the appropriate ketone (page 2437, Scheme I and accompanying text).

*Adv. Synth. Catal.* (2003), 345, p. 165-168 teaches the synthesis of optically active 1-phenyl-2-perfluoro-substituted ethylamines starting from the appropriate ketone (page 166, Scheme I and accompanying text).

The synthetic strategy of the prior art and the instant invention is identical. Applicant distinguishes over the cited prior art only in that the fluorinated substituent is not a perfluoro substituent. However as both references make explicitly clear (page 2437, column 2, second full paragraph; and page 166, column 1, last sentence, respectively), this synthetic approach is a general approach and may be extended to other fluorinated amine starting materials.

The instant processes would have been obvious to one of ordinary skill in the art at the time of the invention given the teachings of the cited prior art and one would have expected that the instant non-perfluorinated starting materials would have yielded the desired corresponding 1-aryl-2-fluoro-substituted ethylamines of the instant invention.

***Allowable Subject Matter***

Claims 7-15 are allowed.
